Informed Consent

I hereby request and consent to the performance of chiropractic adjustments, other chiropractic procedures, including various forms of soft-tissue assessment and release techniques, subtle energy rebalancing and supportive therapies on me (or on the person named below for whom I am legally responsible) by Haleigh Cooper, DC at Community First Chiropractic .

I have had the opportunity to discuss with the doctor and/or with other personnel the nature and purpose of chiropractic adjustments. I understand and am informed that, as in the practice of medicine, there are some risks assumed in receiving care and treatment, including, but not limited to, muscle spasms, aggravating and/or temporary increase in symptoms, lack in improvement of symptoms, sprains, fractures, disc injury, stroke and dislocations. I do not expect the doctor to be able to anticipate and explain all risks and complications, and I wish to rely on the doctor to exercise professional judgment during the course of any procedure which, based on the facts then known, is in my best interest.

Chiropractic care and treatment involves the science, philosophy and art of locating and adjusting spinal interference patterns and misalignments and as such, is oriented toward improving spinal, neurological and muscular functions and ultimately improve health. There has been no promise, implied or otherwise, of a cure for any specific symptom, disease or condition as a result of treatment in this clinic. I understand that the chiropractor will use her hands upon my body to adjust joints and release muscles, which may cause an audible “click” or “pop” during the procedure.

I further understand that chiropractic adjustments and supportive treatment is designed to reduce and/or correct subluxations, allowing the body to return to improved health. It can also alleviate certain symptoms through a conservative approach with hopes to avoid more invasive procedures. However, like all other health modalities, results are not guaranteed and there is no promise to cure. Accordingly, I understand that all payment(s) for adjustment(s) are final and no refunds will be issued. However, prorated fees for unused, prepaid treatments will be refunded if you wish to cancel the treatment.

I further understand that there are treatment options available for my condition other than chiropractic procedures. These treatment options include but are not limited to self-administered, over the counter analgesics and rest; medical care with prescription drugs such as anti-inflammatories, muscle relaxants and painkillers; physical therapy; steroid injections; bracing; and surgery. I understand and have been informed that I have the right to a second opinion and can secure other opinions if I have concerns as to the nature of my symptoms and treatment options.

I understand that as part of my healthcare, this Practice originates and maintains health records describing my health history, symptoms, examination and test results, diagnosis, treatment, and any plans for future care or treatment. I understand that this information serves as a basis for planning my care and treatment; a means of communication among other health professionals who may contribute to my care; a source of information for applying my diagnosis and treatment information to my bill; and a means by which a third-party payer can verify that services billed were actually provided.

I have read, or have had read to me, the Informed Consent to Chiropractic Adjustments and Care. I have also had an opportunity to ask questions about its content, and by signing below I agree to the above-named procedures. I intend this consent form to cover the entire course of treatment for my present condition and for any future condition(s) for which I seek treatment.

Terms of Acceptance / Philosophical Agreement

When a person seeks chiropractic health care and we accept to provide such care, it is essential that we both have a clear understanding of our objectives, goals, and responsibilities in this special relationship.

The following concepts are central to the way chiropractic is practiced in this office. I share these ideas so that we can be in alignment of purpose from the very beginning.

- There is an intelligence within each of us that keeps us alive, that runs and coordinates all our physiological functions, repairs, renews, regenerates, and heals.
- The Nerve System is the main coordinating and distribution system for the body's innate intelligence.
- Alterations or distortion in the shape, position, tone, or tension of the Nerve System (especially at the spine) will interfere with the expression of this intelligence.
- Chiropractors call this interference to the proper functioning of the Nerve System a Vertebral Subluxation. Subluxation causes alternation in nerve function and distorts the communication channels between the brain and the body. The result is a lessening of the body's ability to express its maximum health potential.
- Health is a state of optimal physical, mental, and social well-being, not merely the absence of disease, symptoms, or infirmity.
- An Adjustment is the specific and honoring application of forces to facilitate the body's release and integration of subluxation.
- The sole purpose of the chiropractic adjustment in this office is to assist your body to release vertebral subluxation and benefit from the restoration of clear communication channels in the body. Everyone, regardless of their age, symptoms or ailments, will benefit from a nerve system which is more flexible, elastic, and free of vertebral subluxation.
- Chiropractic is not a substitute, an alternative or a preventative form of medicine. We do not offer diagnosis or treatment for specific diseases. Our only practice objective is to eliminate major interferences to the expression of the body's innate wisdom and to support your body to hold and integrate adjustments and healing. If you desire advice, diagnosis, or treatment for specific diseases, we encourage you to seek the council of a medical disease care specialist.

I, _____, have read the above statements and understand the doctor's objectives pertaining to my care in this office. I accept chiropractic care on this basis.
